

Wall Plug Switch For Outdoor Use (IP44)

Make electrical devices smart – also in your garden

Switches all loads
up to 3500 W

Switching by local button or
by Z-Wave wireless technology

Local button controls the local plug
as well as other functions in network

Color LED indicates
switching status

Build in virtual power meter

Supports secure communication

IP44 classification for
indoor and outdoor use

Complies fully with
Z-Wave Plus standard

Firmware updates
over the air (OTA)

The **POPP Switch Plug IP44** for indoor and outdoor use can simply be placed between a wall outlet and an electric device switching this device. Therefore it is an easy to operate but really important core component of your smart home. Any electrical device in and around your home controllable by on/off commands will become smart and intelligent.

The adapter plug can switch all loads up to 3500 W. A multicolor LED indicates the switching status and the assignment of the colors to the switching status can additionally be defined by the user.

The local button can control the local on/off functions but can also be used to control other functions in a Z-Wave network. Single and double clicks are distinguished. The device will report any change of the switching status to a central gateway regardless the origin of the switch (local or wireless).

The device is IP 44 rated and can therefore be used both in dry as well as humid environments in- and outdoor. A built in virtual power meter will report the power consumption of the load attached. However the user must configure the assumed constant power draw of the load.

The device is certified and tested against all important European Safety Regulations and complies fully with the Z-Wave Plus standard. The device supports secure communication and the firmware can be upgraded over the air (OTA).

-  Heating and Climate Control
-  Security Systems
-  Lighting Control
-  Alarm Systems
-  Remote Controls
-  Control Center/ Gateway
-  Sensors
-  Device Control/ Plugs
-  Window and Blind Control

With POPP products your home will become intelligent. Control your house or apartment by tablet pc, desktop pc, smartphone or remote control. Activate the heating when you're heading home, close your windows automatically if the weather changes and receive short messages when sensors set off any alarm at home.

For its smart home products POPP trusts Z-Wave technology. Z-Wave is the international leading standard for wireless communication between intelligent devices in homes and offices and thereby the basis for successful home automation.

POPP smart home products are compatible and interoperable with Z-Wave certified devices from more than 300 manufacturers worldwide.
