POPP

10-Year Smoke Sensor with Indoor Siren
First Z-Wave 10-year smoke sensor

Z-WAVE PLUS

Q Label certification
for the smoke detector head

Fixed installed 10+1 years
lithium battery

Easy integration into a
wireless Z-Wave network

Intelligent dust compensation
prevents false alerts

Bidirectional wireless protocol
ensures high security

Alarm signal with 85dB/3m

Large test and mute button

Tamper protection

Separate indoor siren usable
as additional alarm option

Front

Back

The POPP Smoke Sensor/Siren sets new safety standards in your home. There are a lot of potential fire sources in your own four walls, for example open fire such as candles or a fireplace. Also an iron, cooking utensils or numerous other electrical devices can cause fire. Smoke detectors save lifes! This device is also an indoor siren, which saves your property, too.
All Z-Wave smoke detectors in the market comply to the EN14064 standard. But most European Countries have defined much higher requirements for their local markets. One of the most important of these enhanced specifications is the so-called Q label. The most visual and not only enhanced requirement is the battery life of 10+1 year that extends the total lifetime of the detector. The Popp smoke sensor is the first wireless smoke detector based on Z-Wave with a smoke detector head that complies to this most recent quality label.

Additional functionality of this new high end smoke detector include periodic automated self test, dust compensation and special functions for sleeping rooms (no blinking) and easiness of use (large button for testing to be operated by a simple broom stick).

Furthermore, the device can be used as an independent indoor siren within the Z-Wave network, which can alarm in case of detected flood or burglary.
